February 26, 2015

Dear Secretary Detzner:

We, leaders within the Florida State Association of Supervisors of Elections, are concerned about the habitual failure of the Florida Voter Registration System and want to receive an update on the status of the Department of State's voter registration system update. We have made multiple requests for the system to be modernized.

As elected Supervisors, we have repeatedly encouraged the state to modernize its obsolete system and are troubled by the repeated hardware failures that have compromised our state-wide registration system and crippled the operations of local Supervisor of Elections offices around the state. We are accountable to the voters of Florida to provide fair, accurate and transparent voter registration operations and elections. We would like to know how these problems are being solved, how they will be avoided in the future, whether or not the state will modernize its obsolete system this year, and if not we would like to have an explanation to bring to our constituencies when repeated failures arise.

Sincerely,

Jerry Holland  
President

Florida State Association of Supervisors of Elections
