REAL TIME TURNOUT

What is it?

- Real Time Turnout is the number of people who are voting at the polling place in the current election...it is not results.

What is it?

Turnout can be provided by:

- ⦿ Different voting groups, VBM, EV and ED
- ⦿ Precinct
- ⦿ Party

This makes the data more useful for interested parties

How does it work?

- ① The electronic poll book uses an internet connection that runs through a secure service and updates the voter database in real time.
- ② Querying these results at frequent intervals will give you a snapshot of what is happening in the polling place on Election Day.

How does it work?

- ◎ Your turnout is only as good as your connection.

Disclaimer: *“Election Day turnout is based on those precincts reporting activity to the Elections Service Center.”*

- ◎ If you do not establish a connection on Election Day, you will not have Election Day turnout.

Who really cares?

- The media
- Political activists
- Candidates
- Your staff

Can be used as an extension of your social media plan

How can I do it?

- You must have an electronic poll book at the polling place on Election Day with the ability to report turnout back to your voter registration system.

How can I do it?

If you are a Web Focus and an EVID customer, VR has done the work for you.

How can I do it?

- If you are not a VR customer and do not have EViDs....
 - Good luck 😊

Drawbacks

- ⦿ Once you provide it, it's expected
- ⦿ If you are not receiving communication from a polling place, your turnout totals will be skewed...your turnout will be reported lower than it actually is

Why be social?

- ① The expectation is to have government services online
- ① You spend a lot of effort to get out into the community; the online community should be no different

Why be social?

- Inexpensive communication channels
- Great way to communicate what's happening year round
- Reduces call volume
- Less formal approach to get the correct facts

How?

- ◎ Identify the following:
 - The goals you would like to accomplish
 - Who in your organization will be responsible for updating the content

How?

- Which networks you would like to utilize

| | % Internet Users | % Total Americans |

Pew Research Center

How?

- 59% of journalists use twitter
- 51% of journalists worldwide say they use Twitter or Facebook, to gather new stories if the author is credible

How?

- Just go for it

“Whether or not Facebook is great is not the point. The point is, there are hundreds of millions of people there. Why not spend time where they are? You may not like social media, but hundreds of millions of other people do.”

Bill Greeves
Director of Communications and Information Technology
Roanoke County, Va.
